***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13-15, 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lentini et al. (USP 6,418,039) in view of Cuk (USP 6,400,579). Lentini discloses the claimed invention except for the use of flux cancellation with the use of flyback converters. Cuk discloses that it is known in the art to provide the use of flux cancellation with the use of flyback converters. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the method and apparatus to digitally control turn-off time of synchronous rectifiers in isolated topologies for switched mode power supplies of Lentini with the use of flux cancellation with the use of flyback converters of Cuk, in order to provide a high efficiency as well as low component stresses for increased converter reliability.

***Response to Arguments***

5. Applicant's arguments filed 1-14-09 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., prevent power losses due to cross conduction and reverse recovery losses) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the

Art Unit: 2838

specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant is reminded that “ A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.” (Patent Rules § 1.56 Duty to disclose information material to patentability.)

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
